

This will show you how to use the Windows 10 built-in screen capture system to record a video of an application.

Step 1: Open the application you wish to record such as PowerPoint. Only application recording is supported. Full screen recording is currently not supported.

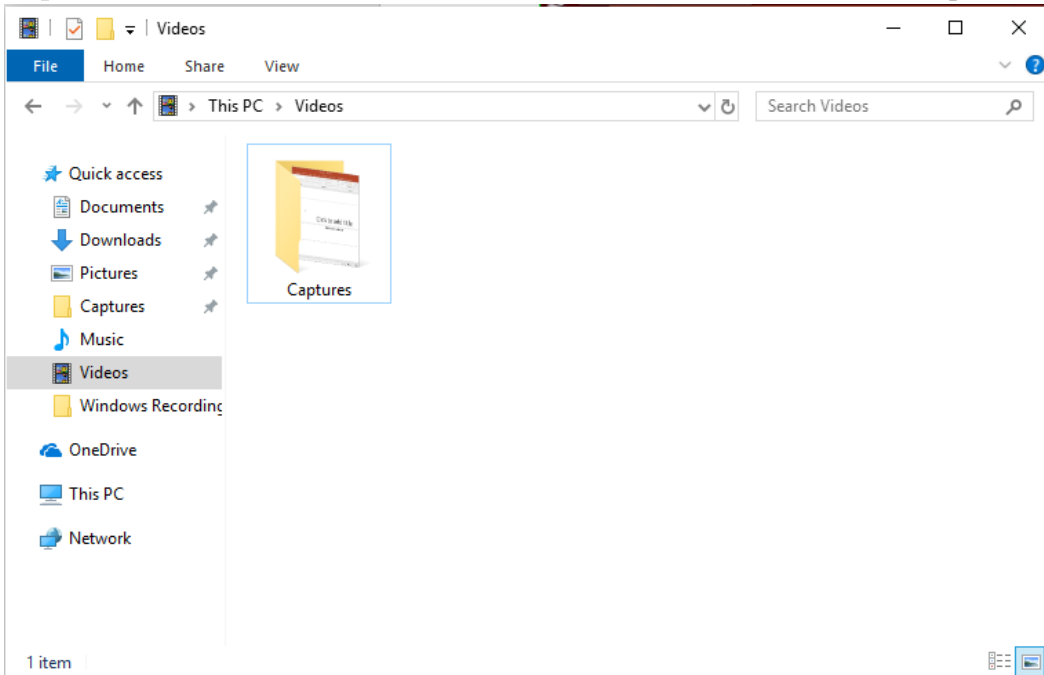

Step 2: Press the Windows logo key + G (button)" and select the record option

Step 3: Once done recording press the "Stop Recording (button)"

Step 4: The record files will be located in the Videos folder located in File Explorer.
